

ROCKING CHAIR

ABSTRACT

A rocking chair with an oscillating base, a seat affixed to the base and a back rest. The seat being provided with two
5 downwardly projecting struts connected to lower oscillating sections at the lower ends, each section connected to an oscillating parallelogram formed by oscillating rods whereby the upper sections of the parallelogram is mounted inside the downwardly projecting struts at the bottom. The downwardly
10 projecting struts being formed as a single component by means of a downwardly open U-shaped holding arc having flat lateral surfaces attached to the lower oscillating longitudinal sections, the upper sections rotatably mounted inside the U-shaped holding arc as transversal carriers of a column affixed
15 to a base plate.
